How To Make Money **WITHOUT** Completing Surveys? **YES**, it is Possible!

By now you're probably wondering whether taking these long, arduous surveys is really worth your time. With most sites having stringent screenings, long waiting periods for payments, low payouts, and high payment thresholds to redeem them, taking these surveys may sound like a lot of effort.

The good news is that there are additional ways that you can earn money through paid survey sites. Even better, you don't even need to spend time answering a single questionnaire! So, how can you do this? **Here's the lowdown.**

You can do this by signing up with various online affiliate programs and receiving a commission each time someone clicks on your link and completes a survey. In fact, you are almost guaranteed to make more money through referrals than you would by spending hours doing long surveys without much incentive. Many people who have gone this route have reported earning hundreds of extra dollars per month, making this a much more profitable option in the long run.

That said, it is important to know that this isn't a get-rich-quick scheme! You will still need to put the time and effort into creating your own with relevant content that makes people want to visit your link so that they can sign up for these survey programs.

So, how can you go about doing this? **You simply need to visit one of the popular survey sites and select the “affiliate” option under partners, and you can start the process of signing up.** To make things a little easier for you to get started, I’m going to list some of the most popular survey affiliate sites that you can use to apply.

How To Promote Your Affiliate Links Like a Pro

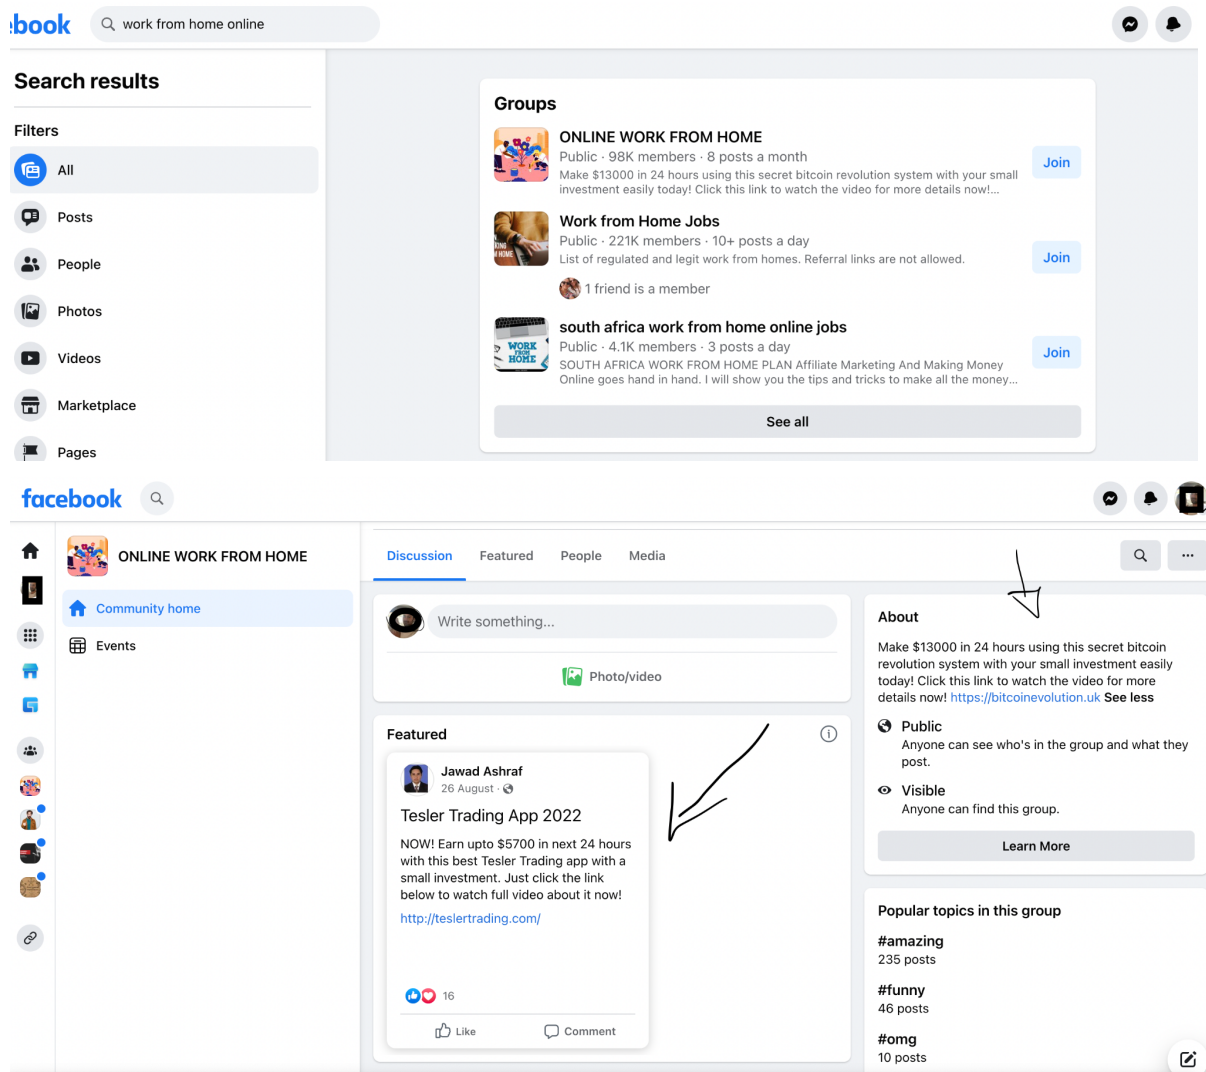

Now that you know which are the best survey sites and affiliate programs, you're probably wondering **how you can best promote your affiliate links so that you generate tons of leads and commission!** Let's dive in.

Facebook Groups

Many people are looking to earn an income from home online and are unaware of the fact that you can earn an income from online surveys. One of the best free ways to teach people is through a Facebook Group.

Create a Facebook Group with a central theme of working from home online and earning money remotely. You can then invite people to join your Facebook Group via your friends list or, by promoting your Facebook group on other Facebook Groups such as Buy and Sell groups, Work from home groups, Stay at home mom groups etc.

Your Facebook Group should have your affiliate links inside its About section as well as pinned in a post at the top of your group's feed as a featured post.

Facebook groups with topics such as **working and earning money from home** are always excellent choices! Simply add your affiliate link to the introduction of the group and you're good to go. This is a perfect solution for those who want to promote their affiliate links without spending unnecessary money.

You're welcome to use our list of survey sites above and create your own PDF/Guide about how to earn money with online surveys. However, be sure to include your affiliate links on each of the online survey recommendations that you include in the list.

Label the PDF/Guide with a catchy title like "Free Guide On How To Earn Money From Home With NO Experience". If you give this guide away for free and promote that it is a free guide, you should get a large number of people interested in the guide. They will then download the guide and click on your affiliate links, from which you will earn a commission per survey that they complete/per sign up.

The Influencer Method

Another way that you can promote your affiliate links is by creating a matching Facebook, Instagram, and TikTok page. Once this has been done, you can start finding popular influencers to create posts that contain your link.

Here's a simple way to sum up how this works:

- You find an influencer who has 15k+ followers on Instagram/TikTok.
- You pay them \$20 to post about your "Easy Money Making Method"
- Their post contains your affiliate link
- Their followers click on your link and sign up to the online survey website
- You earn commission per sign up

In order to find popular influencers in the work from home niche, you'll need to do some research on Instagram and TikTok by making use of the search bar on these platforms. By typing in keywords like 'work from home' and 'earn from home' you should be able to find Instagram and TikTok influencers who post about this topic often and have over 10 000 followers.

You'll need to direct message these influencers/pages and inquire about the cost of a sponsored post. Depending on how many followers the Page/Influencer has, the price will vary per sponsored post.

This should only cost you between \$10- \$50 per post, depending on the Influencer/Page that you choose to use. The influencer/Page will then create a post about your “lesser-known money making method” and include your affiliate link on their post.

Their followers will then click on your affiliate link and hopefully sign up. With this method, you’re likely to get a 2-4x return on your investment and you’re likely to get plenty of clicks, making this the perfect return on investment opportunity! You can also ask the influencer/page to post about your own Page that you created, where they recommend to their followers to go and like/follow your Page in order to get the free guide/pdf about earning money from home.

Imagine paying an influencer/page for a sponsored post and spending \$20, only to wake up the next day and see that you have \$100-150 in commissions in your affiliate accounts. Its definitely an easy way to earn an income with very little investment!

Lastly, you can also post your affiliate link on popular forums such as Reddit and Quora. That said, it’s important to note that **you cannot post direct affiliate links on these platforms**. If you break this rule, you may face an account ban. However, this is not to say that it isn’t possible! You just need to be a little more creative with how you go about it. As recommended above, you can create a link to your free guide/pdf and offer this to people on forums for free. The guide will contain all of your affiliate links, thereby bypassing the rules ;)

Wondering how you can go about doing this? [Here’s how to post affiliate links on popular forums such as Reddit and Quora.](#)

You can also join work from home forums on social media and post your affiliate links daily on them, which is also **completely free!**
